Smith Premier

SP

Ten Superiorities

of the

SMITH PREMIER No. 60

are described on the
following pages

Carriage A

Writes a line 8.6 in. (21.8 cm.) long. Holds paper 10.6 in. (26.9 cm.) wide.

Simple in design, compact, strong, the Smith Premier No. 60 will give enduring service.

1 Open-face construction, without the obstruction of bars or rods, gives complete visibility and accessibility.

2 The light rigid carriage is suspended between race rails in which the rolls are at right angles. These hold the carriage firmly and it moves without vibration and almost without friction on its roller bearings.

Carriage B

Writes a line 10.1 in. (25.6 cm.) long. Holds paper 12.1 in. (30.7 cm.) wide.

Assembled with the utmost care, adjusted accurately to within one-thousandth of an inch. The writing is true and even.

3 The platen, 1¾ inches in diameter, is one of the largest to be found on standard typewriters. This feature gives you a better grip on the paper with consequent easier handling of the paper, increases the durability of the platen and adds to its life.

4 The simple, automatic positive ribbon mechanism acts promptly when end of ribbon is reached. No slack or cutting of ribbon when it reverses.

Carriage C

Writes a line 12.6 in. (32.0 cm.) long. Holds paper 14.6 in. (37.0 cm.) wide.

Designed for effortless operation, the Smith Premier No. 60 minimizes the strain of a long day's work.

5 The ribbon mechanism provides four positions: One position for each color of two-color ribbons, a stencil-cutting position, and a serpentine movement for one-color ribbons which insures the use of the entire ribbon.

6 The type bar segement shifts for capitals. The carriage moves only from side to side. This divides the labor usually performed by the carriage. The weight to be shifted is constant regardless of the width of the carriage. This lessens fatigue and increases speed.

Carriage D

Writes a line 16.6 in. (42.1 cm.) long. Holds paper 18.6 in. (47.2 cm.) wide.

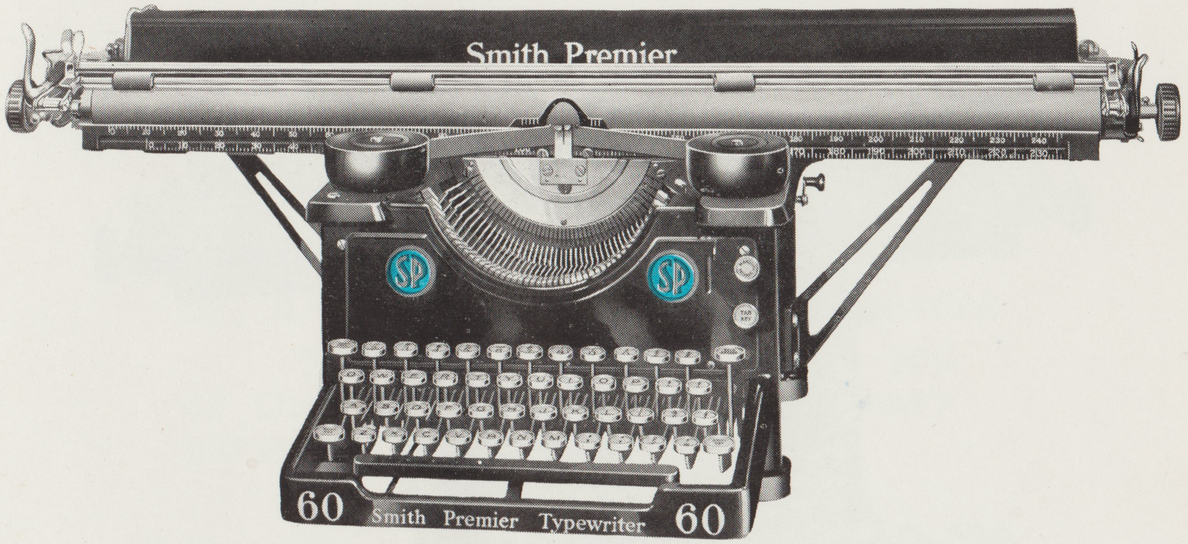
Carriage E

(Illustrated on page 6)

Writes a line 20.6 in. (52.3 cm.) long. Holds paper 22.6 in. (57.4 cm.) wide.

7 Control of type bar through its entire flight eliminates double printing and increases speed.

8 The marginal release and tabulator keys are conveniently located on front plate of machine.



Carriage F

Writes a line 24.6 in. (62.5 cm.) long. Holds paper 26.6 in. (67.5 cm.) wide.

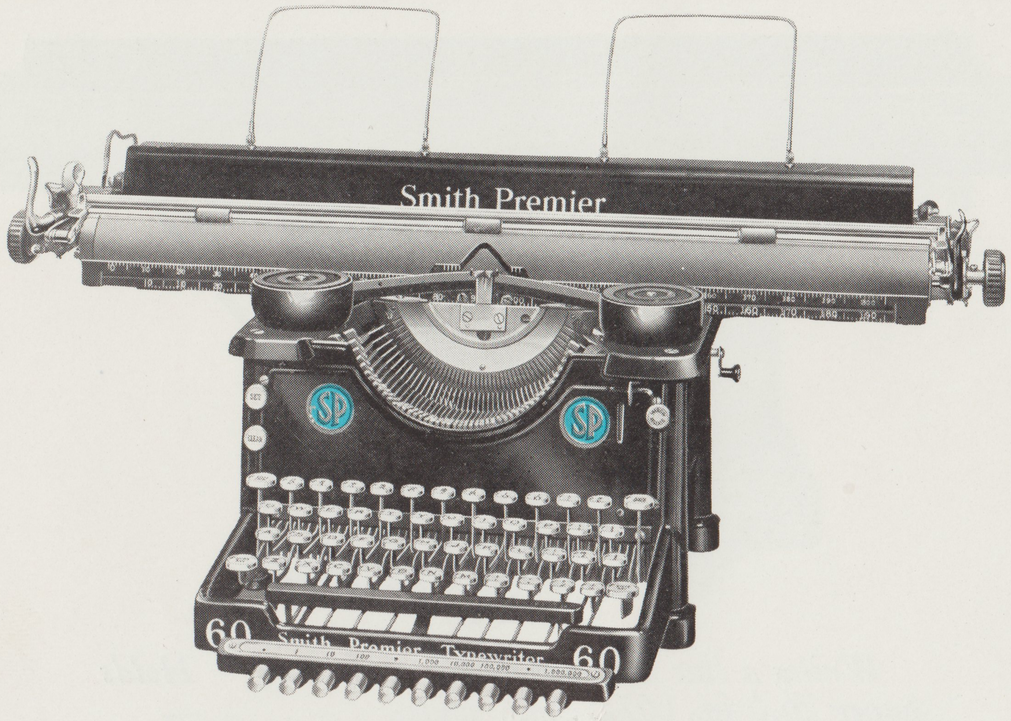
Carriage G

Writes a line 30.6 in. (77.7 cm.) long. Holds paper 32.6 in. (84.8 cm.) wide.

As easy to write on the wide carriage models as on the correspondence machine.

9 The New Smith Premier has 46 keys which print 92 characters, eight more than most typewriters afford. Especially convenient for writing in languages requiring accents and diacritical marks.

10 The operation of the keys is so easy that it feels as though they touch a cushion at the bottom of the down stroke.



Tabulating Machine

The illustration shows carriage E. Furnished in all standard widths.

This machine is the Smith Premier No. 60 equipped with 10-key Tabulator.

The ten tabulator keys enable the operator to bring the carriage with one stroke to any one of ten writing points in columns. As many columns may be written as the width of the paper will allow.

Convenient for listing figures, dollars and cents, pounds, shillings and pence, francs, lira, or any other currency.

The tabulator stops are key-set; that is the stops are set and cleared from the front of the machine, enabling the operator to change easily and almost instantaneously from one form to another.

Type Styles

No.3 Elite 12-059

A small, elegant letter which has no equal for private correspondence.
1,2,3,4,5,6,7,8,9,0

No. 6 Pica 10-068

The standard type. Over 90% of the machines used for ordinary purposes have this type.
1.2,3,4,5,6,7,8,9,0.

No. 10 Large Pica 10-079

A slightly larger letter of the same style as the regular pica.
1,2,3,4,5,6,7,8,9,0.

No. 12 Medium Roman 10-080

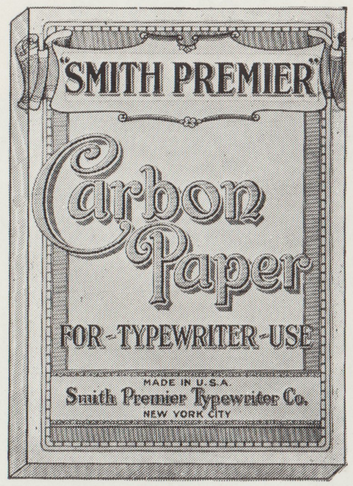
Much used by professional men, and also adapted for general uses.
1,2.3,4,5,6,7,8,9,0.

Premier Ribbons

Of course, Smith Premier Typewriters will produce their *best* work when fitted with the *best* ribbons.

Premier Brand Ribbons are durable and will give utmost satisfaction. The colours are bright and strong and they will not fill the type. They are made for all purposes and for all makes and models of machines in all standard colours and combinations of colours.

The standard lengths are 12 yds. (10.97 meters) for Standard machines, 6 yds. (5.49 meters) for Portables.



Carbon Papers

Smith Premier Carbon Papers are unmatched for sharpness and clearness of impressions, perfect cleanliness and long-lasting qualities.

Standard sizes 8x10½ to 8½x14 inclusive, in black, blue, and purple and the following brands:

UNIVERSAL, on 4-lb. imported English tissue, fairly hard finish, presenting a clean surface with a good gloss.

COMMERCIAL, in either 4 or 7-lb. stock, medium hard finish. Excellent manifolding qualities.

SMITH PREMIER, a 7-lb. paper, coating and workmanship similar to Universal. Medium hard finish.

We also supply typewriter papers and other accessories.
